

Addition

(using number line)

Example : 1 Add : $2 + 3$

Draw a number line starts from 0

Now mark 2 on the number line

Then move 3 steps forward from 2

Now you reached 5. So , $2 + 3 = 5$

Example : 2 Add : $13 + 6$

Draw a number line starts from 10

Now mark 13 on the number line

Then move 6 steps forward from 13

Now you reached 19. So , $13 + 6 = 19$.

Example : 3 Add : $26 + 2$

Draw a number line starts from 20

Now mark 26 on the number line

Then move 2 steps forward from 26

Now you reached 28. So , $26 + 2 = 28$.

Example : 4 Add : $45 + 8$

Draw a number line starts from 45

Now mark 45 on the number line

Then move 8 steps forward from 45

Now you reached 53. So , $45 + 8 = 53$

Example : 5 Add : $71 + 4$

Draw a number line starts from 70

Now mark 71 on the number line

Then move 4 steps forward from 71

Now you reached 75. So , $71 + 4 = 75$

Example : 6 Add : $87 + 9$

Draw a number line starts from 87

Now mark 87 on the number line

Then move 9 steps forward from 87

Now you reached 96. So , $87 + 9 = 96$
