

Addition with Objects

Example 1 : How many bananas are there in both plates?

Solution :

In 1st plate, we have 5 bananas.

In 2nd plate, we have 3 bananas.

The number of bananas in both plates = 8

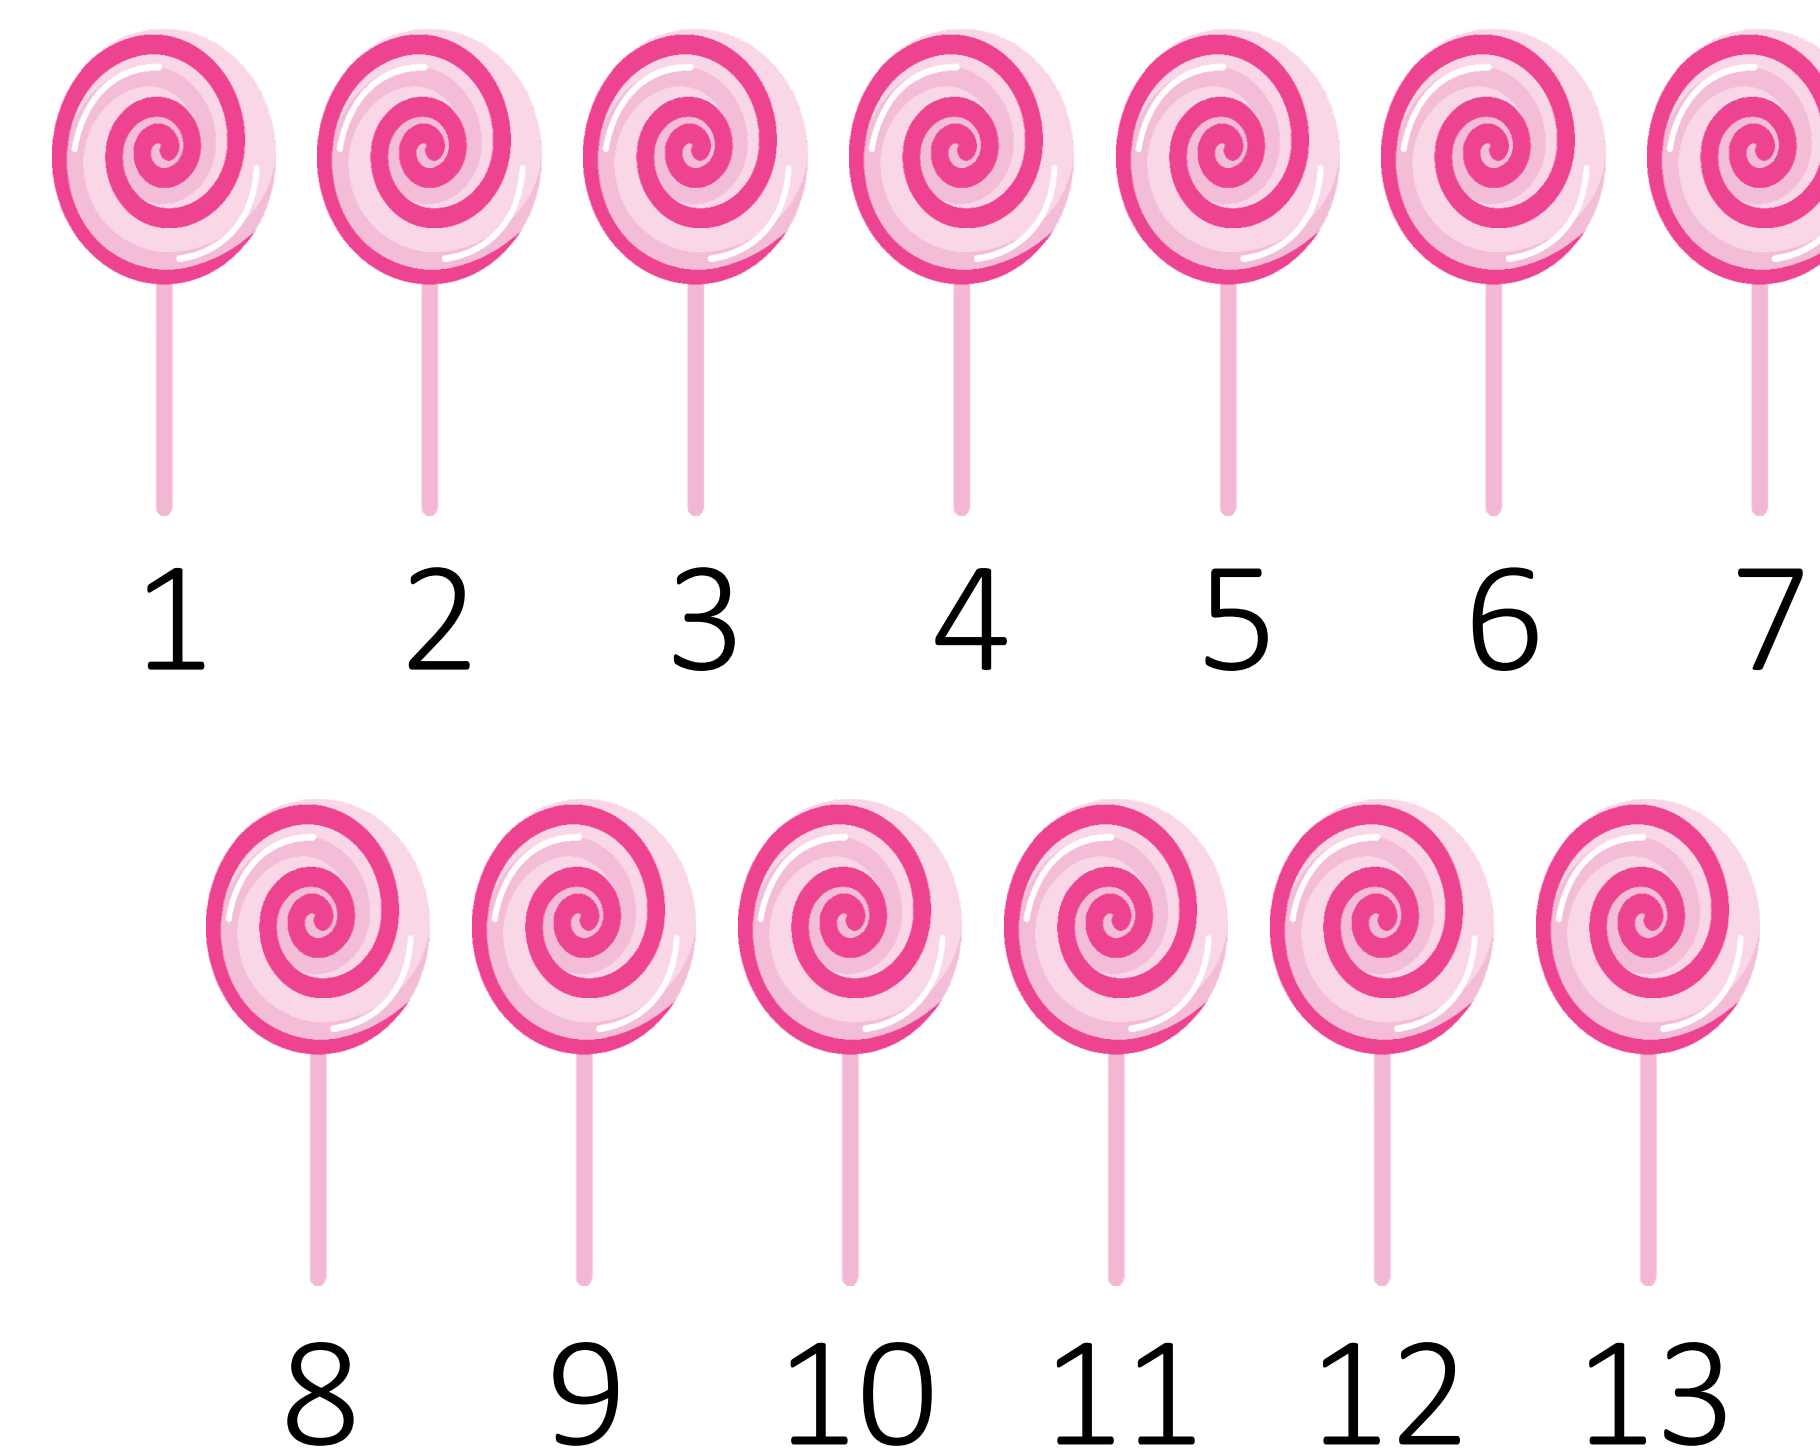

Example 2 : How many candies are there in both cups?

Solution :

In 1st cup, we have 7 candies.

In 2nd cup, we have 6 candies.

The number of candies in both cups = 13

Example 3:

How many pencils are there in both boxes?

Solution :

In 1st box, we have 10 pencils.

In 2nd box, we have 7 pencils.

+

=

The number of pencils in both boxes = 17

Example 4:

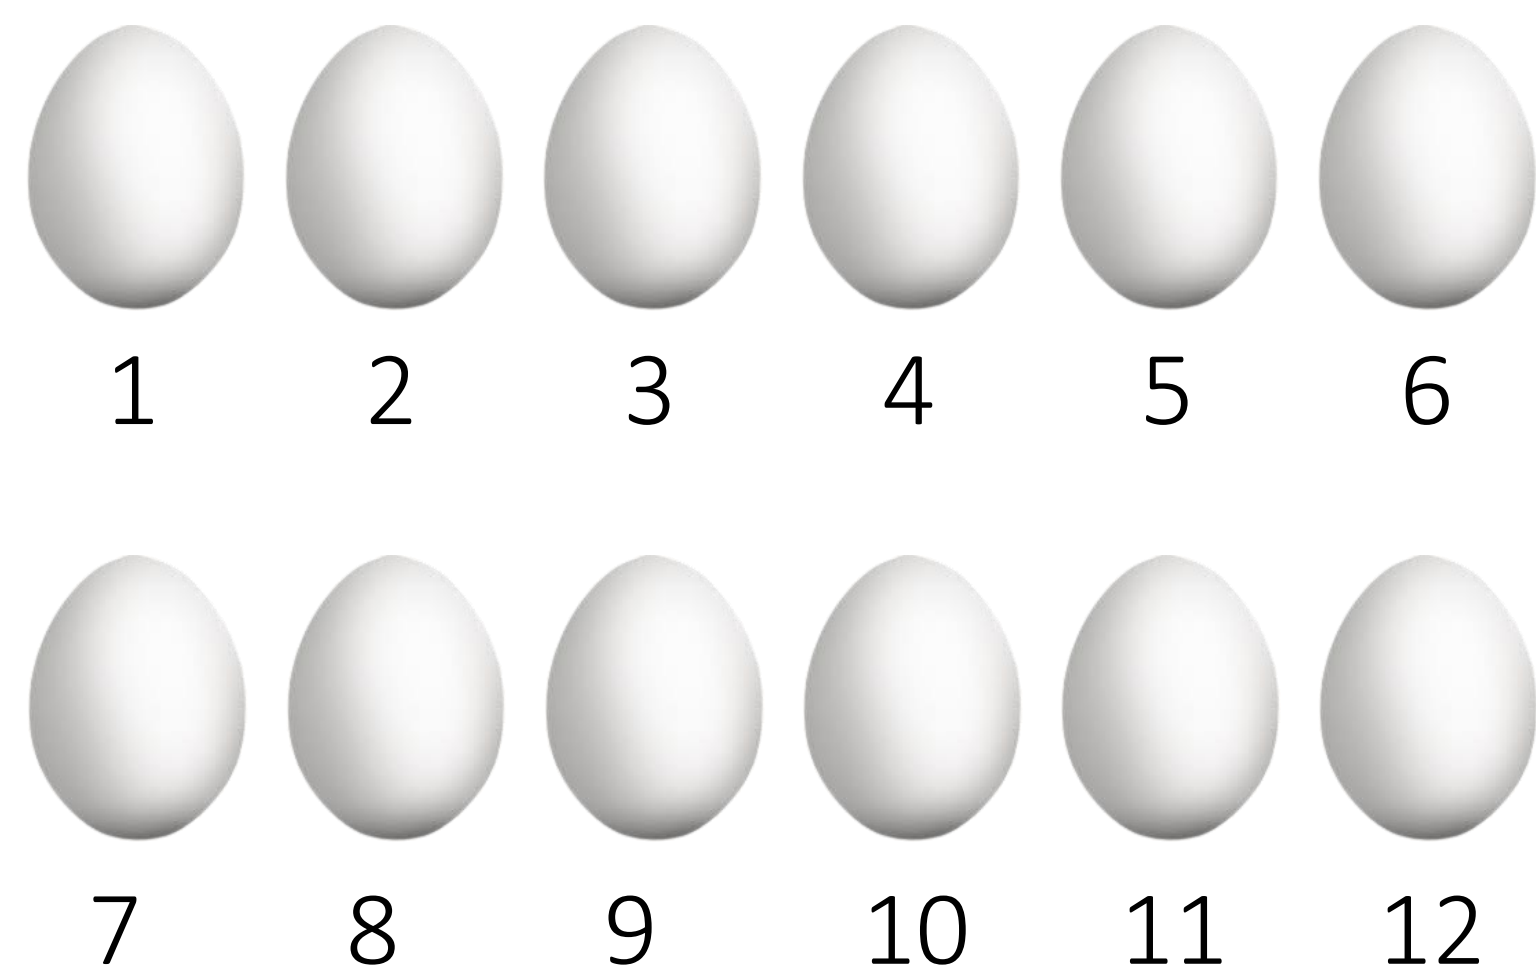

How many eggs are there in both trays?

Solution :

In 1st tray, we have 12 eggs.

In 2nd tray, we have 7 eggs.

The number of eggs in both trays = 19

Example 5:

1. Find the number of apples and oranges?
2. Find the number of apples and melons?
3. Find the number of oranges and melons?

Solution : 1. The number of apples and oranges :

8 apples

7 oranges

The number of apples and oranges = 15

2. The number of apples and melons :

8 apples

5 melons

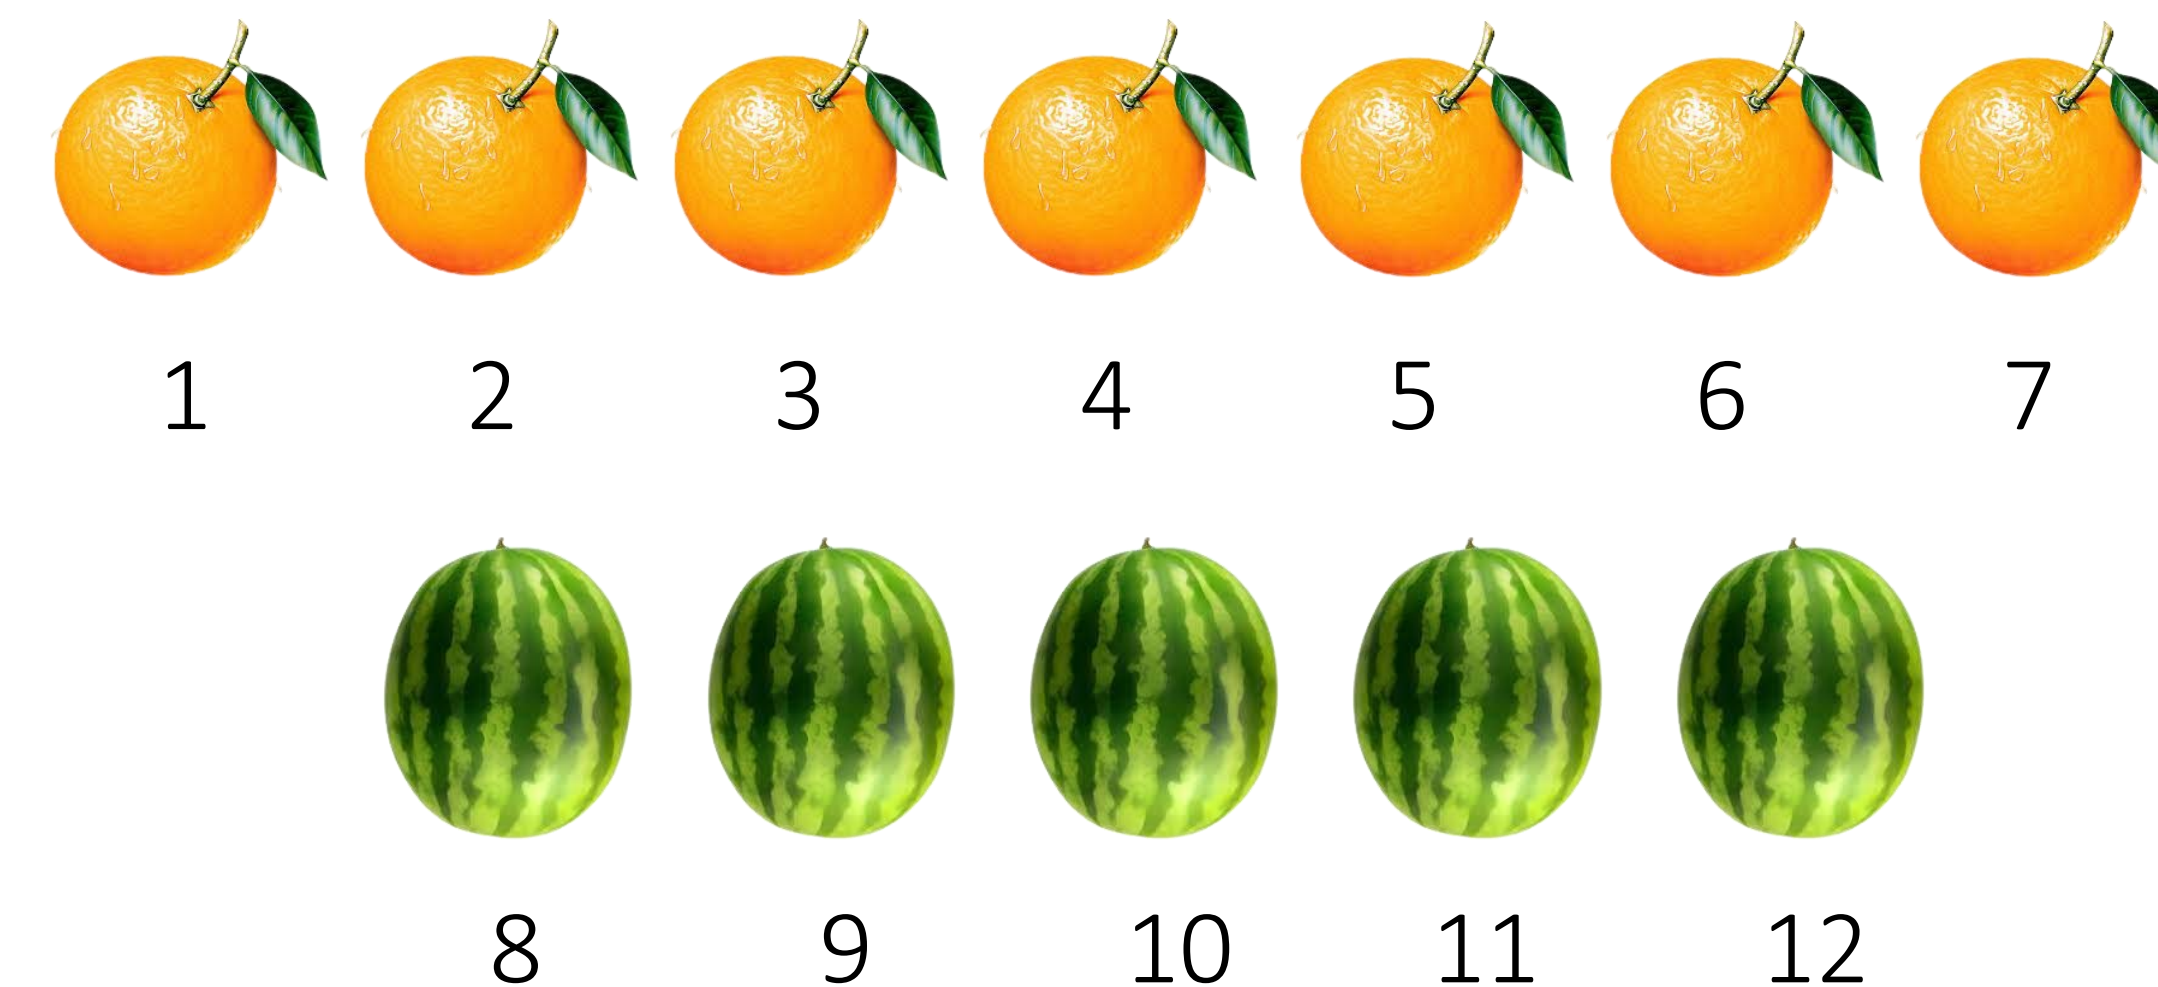

The number of apples and melons = 13

3. The number of oranges and melons :

7 oranges

5 melons

The number of oranges and melons = 12
