

CONCEPT OF ZERO

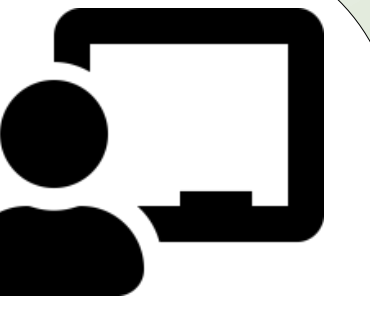

ZERO

- Zero means **nothing**.
- Zero denotes that **no amount** or **no objects** or **no values**.
- It's not worth itself but it can change the value of other numbers.
- The symbol of zero is '**0**'

EXAMPLE

There are 3 birds on this tree.

A bird flew to somewhere.
Then, there are 2 birds.

Another bird also flew away from the tree. Then, there is **only one** bird on this tree.

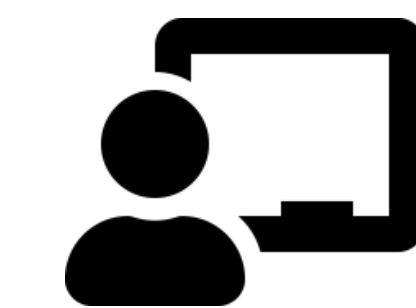

That last bird also flew. Now,
There is no bird on the tree.

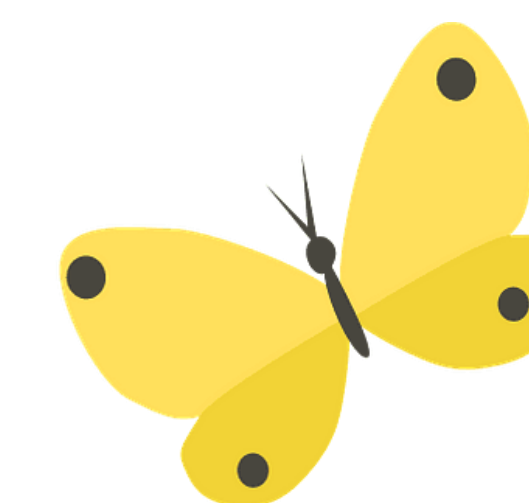

That means **0** birds

EXAMPLE

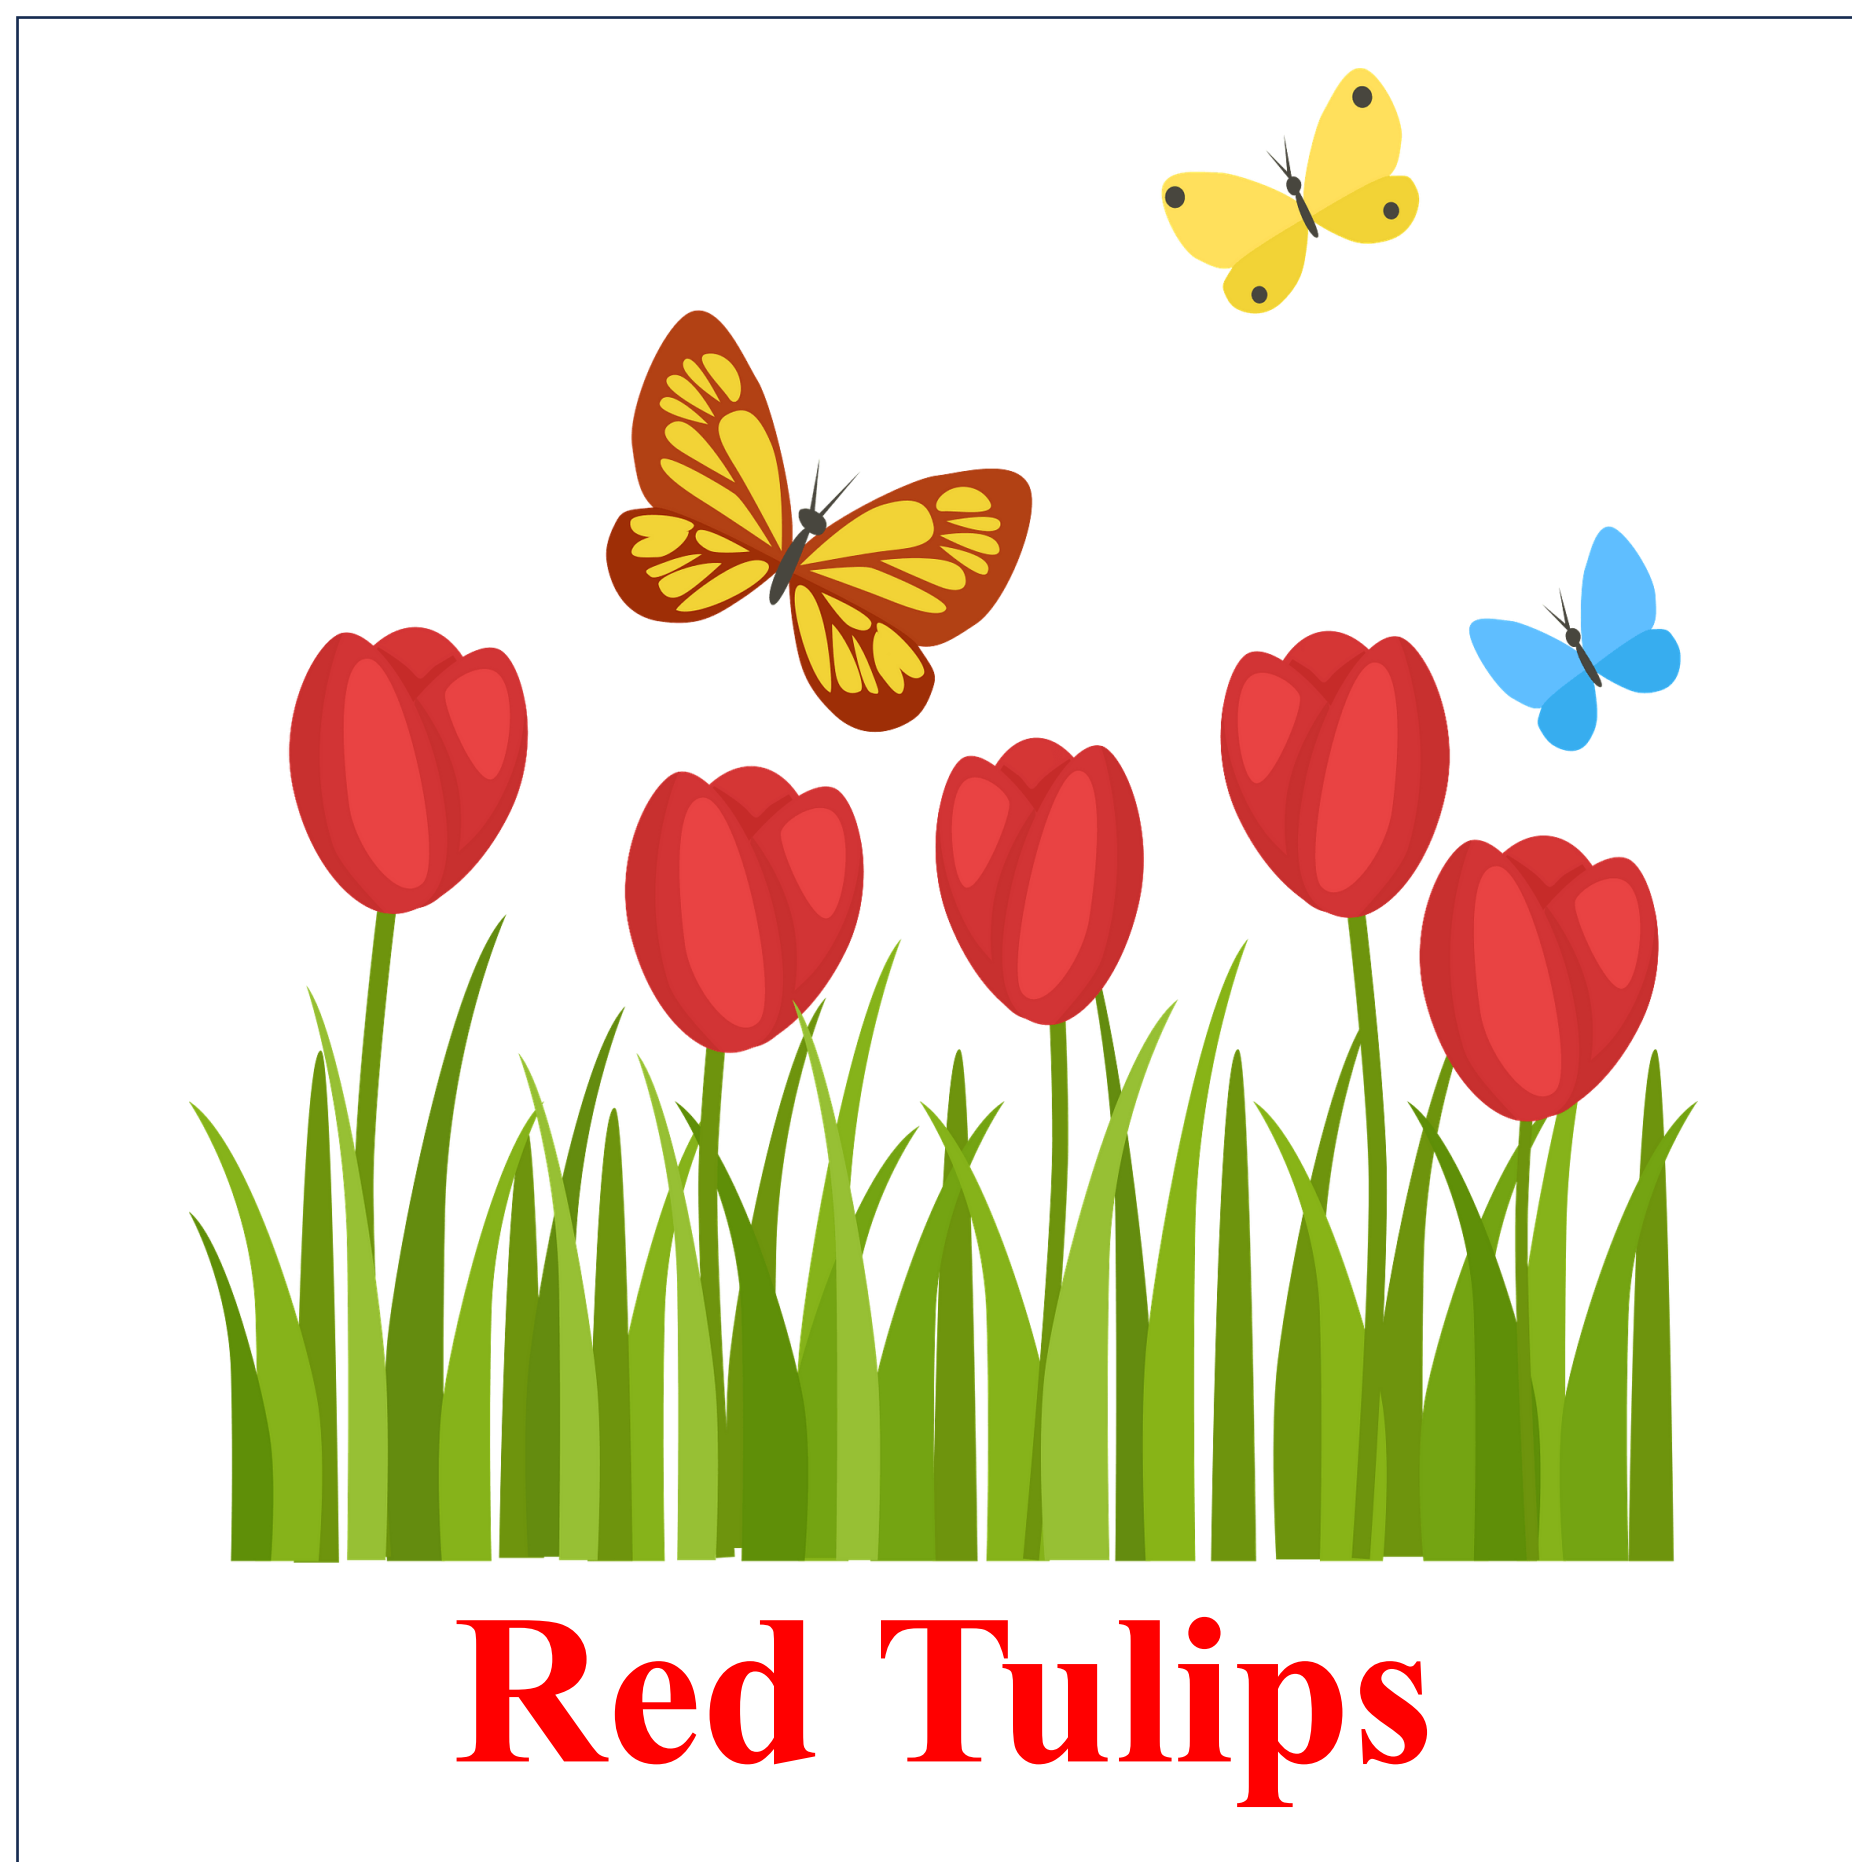

Here, we see an another example.

Yellow Tulips

Red Tulips

There are **3** butterflies on the **red** Tulips.

There are **0** butterflies on the **yellow** Tulips.

That means no butterflies are there.

EXAMPLE

Here, we have 3 baskets and some strawberries.

3 Strawberries

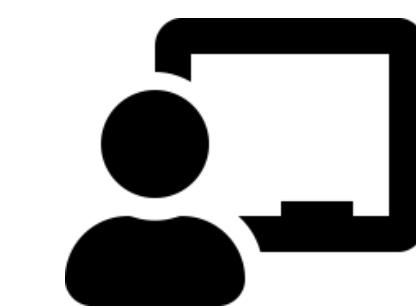

1 Strawberry

0 Strawberry

Nothing(Empty)

EXAMPLE

This boy has 3 balloons.

All three balloons have flew away from him.

Now, The boy has 0 balloons.
