

# Subtracting two digit numbers without carrying

## Example 1:

**Subtract 48 - 12**

## Solution:

$$48 - 12 =$$

Using place value, we can write

	Tens	Ones
	4	8
-	1	2
	<hr/>	
	<hr/>	

Subtract ones place. After that subtract tens place.

	Tens	Ones
	4	8
-	1	2
	<hr/>	
	3	6
	<hr/>	

$8 - 2 = 6$   
 $4 - 1 = 3$

Therefore,  $48 - 12 = 36$

## Example 2:

**Subtract  $99 - 57$**

## Solution:

$$99 - 57 =$$

**Use place value.**

**Subtract the ones place. After that subtract tens place.**

	Tens	Ones	
	9	9	
-	5	7	$9 - 7 = 2$
	<hr/>		$9 - 5 = 4$
	4	2	
	<hr/>		

**Therefore,  $99 - 57 = 42$**

### Example 3:

Subtract  $35 - 23$

### Solution:

$$35 - 23 =$$

Use place value.

Subtract the ones place. After that subtract tens place.

	Tens	Ones	
	3	5	
-	2	3	$5 - 3 = 2$
	<hr/>		$3 - 2 = 1$
	1	2	
	<hr/>		

Therefore,  $35 - 23 = 12$

## Example 4:

**Subtract  $67 - 46$**

## Solution:

$$67 - 46 =$$

**Use place value.**

**Subtract the ones place. After that subtract tens place.**

	Tens	Ones	
	6	7	
-	4	6	$7 - 6 = 1$
	<hr/>		$6 - 4 = 2$
	2	1	
	<hr/>		

**Therefore,  $67 - 46 = 21$**

## Example 5:

**Subtract 25 - 14**

## Solution:

$$25 - 14 =$$

**Use place value.**

**Subtract the ones place. After that subtract tens place.**

	Tens	Ones	
	2	5	
-	1	4	
	<hr/>		
	1	1	
	<hr/>		

$5 - 4 = 1$   
 $2 - 1 = 1$

**Therefore,  $25 - 14 = 11$**

## Example 6:

**Subtract  $88 - 80$**

### Solution:

$$88 - 80 =$$

**Use place value.**

**Subtract the ones place. After that subtract tens place.**

	Tens	Ones	
	8	8	
-	8	0	$8 - 0 = 8$
	<hr/>		$8 - 8 = 0$
	0	8	
	<hr/>		

**Therefore,  $88 - 80 = 8$**

## Example 7:

**Subtract 56 - 35**

### Solution:

$$56 - 35 =$$

**Use place value.**

**Subtract the ones place. After that subtract tens place.**

Tens	Ones	
5	6	
-		
3	5	
-----		
2	1	
-----		

$$6 - 5 = 1$$

$$5 - 3 = 2$$

**Therefore, 56 - 35 = 21**

## Example 8:

**Subtract 79 - 73**

## Solution:

$$79 - 73 =$$

**Use place value.**

**Subtract the ones place. After that subtract tens place.**

	Tens	Ones	
	7	9	
-	7	3	
	<hr/>		
	0	6	
	<hr/>		

$9 - 3 = 6$   
 $7 - 7 = 0$

**Therefore,  $79 - 73 = 6$**
