

Metric units of measuring weight

(subtraction and conversion without regrouping)

1) Subtract 10 kilograms from 32 kilograms.

Solution:

$$\begin{array}{r} \text{kilograms} \\ 32 \\ - 10 \\ \hline \end{array}$$

So, answer is _____.

Convert the answer into **grams**

2) Subtract 21 grams from 52 grams.

Solution:

$$\begin{array}{r} \text{kilograms} \\ 52 \\ - 21 \\ \hline \end{array}$$

So, answer is _____.

Convert the answer into **kilograms**

3) Subtract 34 kilograms 22 grams from 58 kilograms 36 grams

Solution:

	kilograms	grams
	58	36
-	34	22

So, answer is _____.

Convert the answer into **kilograms**.

4) Subtract 72 kilograms 33 grams from 85 kilograms 54 grams

Solution:

	kilograms	grams
-	85	54
	72	33

So, answer is _____.

Convert the answer into **grams**
