

## Convert mixed fraction to improper fraction

1) Convert  $2 \frac{5}{6}$  to **improper fraction**

**Solution:**

$$2 \frac{5}{6} = \frac{(2 \times 6) + 5}{6} = \frac{12 + 5}{6} = \frac{17}{6}$$

2) Convert  $4 \frac{3}{4}$  to **improper fraction**

**Solution:**

3) Convert  $1 \frac{7}{8}$  to **improper fraction**

**Solution:**

4) Convert  $3 \frac{2}{5}$  to **improper fraction**

**Solution:**

## Convert mixed fraction to improper fraction

5) Convert  $5 \frac{3}{6}$  to **improper fraction**

**Solution:**

6) Convert  $2 \frac{1}{10}$  to **improper fraction**

**Solution:**

7) Convert  $4 \frac{3}{7}$  to **improper fraction**

**Solution:**

8) Convert  $10 \frac{3}{5}$  to **improper fraction**

**Solution:**
