Read the statement and write the answer

1) A bird feeder weights 20 ounces. A bird eats 15 ounces of seeds from the feeder. What is the total weight of the feeder and the eaten seeds?

Solution:

Weight of feeder	= **20 ounces**
Weight of eaten seeds	= **15 ounces**
Total weight	= **20 + 15 = 35 ounces**

2) Two puppies meet up for playtime. One weighs 10 pounds and the other weighs 8 pounds. What is their combined weight?

Solution:
