

Add, convert the given units and write the correct answer

Add : 8 cups and 12 cups

Solution:

$$8 \text{ cups} + 12 \text{ cups} = 20 \text{ cups}$$

Convert cup into fluid ounce

Solution:

$$1 \text{ cup} = 8 \text{ fluid ounces}$$

$$20 \text{ cups} + 12 \text{ cups} = 32 \text{ cups}$$

$$32 \text{ cups} = 32 \times 8 \text{ fluid ounces}$$

$$256 \text{ fluid ounces} = 32 \text{ cups}$$

Add : 21 pints and 16 pints

Convert pints into cups

Add : 20 quarts and 15 quarts

Convert quarts into pints

Add, convert the given units and write the correct answer

Add : 24 gallon and 10 gallon

Convert gallon into quarts

Add : 16 cups and 14 cups

Convert cup into fluid ounce

Add : 35 quarts and 20 quarts

Convert quarts into pints
