

Convert the metric units of capacity (Milliliter to liter)

1) Convert **391 milliliters** to **liters**.

Solution:

$$1 \text{ milliliter} = \frac{1}{1000} \text{ liters}$$

$$391 \text{ milliliters} = 391 \times \frac{1}{1000}$$

$$391 \text{ milliliters} = \mathbf{0.391 \text{ liters}}$$

2) Convert **456 milliliters** to **liters**.

Solution:

3) Convert **670 milliliters** to **liters**.

Solution:
