

Convert customary units of capacity

1) Convert **8 cups** to **pints**.

Solution:

$$1 \text{ cup} = \frac{1}{2} \text{ pints}$$

$$8 \text{ cups} = 8 \times \frac{1}{2}$$

$$8 \text{ cups} = 4 \text{ pints}$$

2) Convert **12 quarts** to **gallons**

3) Convert **24 fluidounces** to **cups**.

Convert customary units of capacity

4) Convert **4 pints** to **quarts**.

5) Convert **6 cups** to **pints**

6) Convert **8 tablespoon** to **fluidounces**.
